

## Description

The SW18 is a folded exponential subwoofer that houses a powerful 4" voice coil 18" loudspeaker. Its response due to the folding goes up to 250 Hz, with a smooth and deep response in the low end band. It has been designed for mid throw applications, because of the flare rate already given. The construction is made of birch plywood painted with weather proof texture black finish.

## Applications

The SW18 can be used as a subwoofer for all mid and short throw applications .

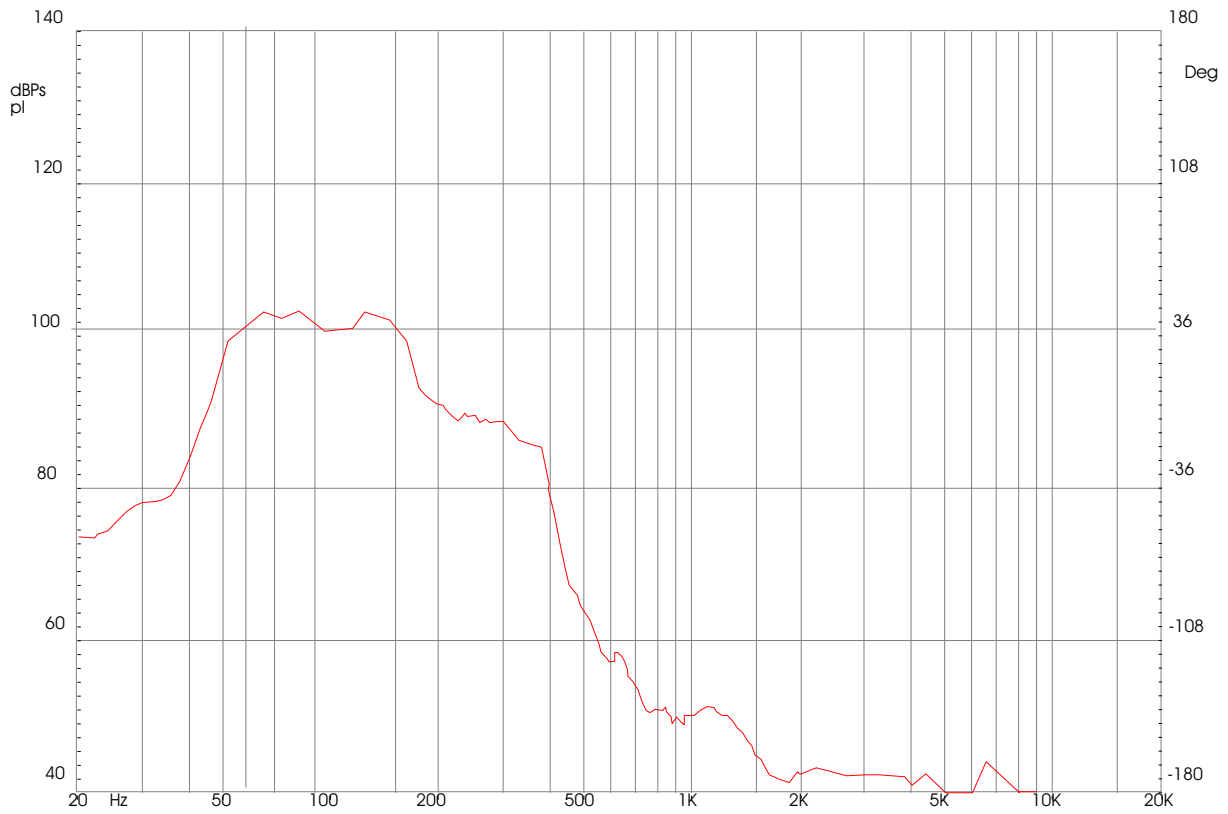

### TECHNICAL SPECIFICATIONS

Frequency Response (Hz)	50 Hz-240KHz □ 4dB
Power Handling (Watts)	600 RMS
Sensitivity	102 dB (1w/1m)
Nominal peak	130 dB
Coverage angle	N/A
Crossover	active up to 250 Hz
Impedance	8 Ohm
Drivers	1X18"
Connectors	2x4pin speakon
Dimensions	54x99x80 cm(H x W x D)
Weight	60 Kg

Active PC  
version  
available
